

MATH 251
Fall 2026

Instructions:

- This exact cover sheet must be included as the first page of your PDF submission for all the quizzes. **Do not** make your own cover sheet as it won't auto-assign your work to your grading account on Gradescope.
- After this cover sheet, you should include your work for the assignment **in order** and **clearly labeled**.
- Your scanned work should be merged with this cover sheet so that you submit **only one** PDF file.
- Submit your one PDF file in the dropbox on myCourses.

Please **clearly** fill out the fields below:

Student ID:
Date:

Quiz 1: Probability and Statistics

Important: For all questions, make sure to show all your work. A correct answer with no work shown will receive very little credit.

1. Suppose you toss a coin three times, use this scenario to answer the questions below
 - (a) What is the sample space for the three coin tosses?
 - (b) What is the probability that that two tosses result in tails?
 - (c) What is the probability that all tosses are the same?

For parts (b) and (c) you may assume that all outcomes in the sample space are equally likely.
